SUMMARY

I am an Information technology Student currently studying in my final year, I am also a self-taught web developer with advanced knowledge of HTML/CSS (bootstrap) and basic knowledge of JavaScript, Java, C# moreover I am very flexible, with good knowledge of Agile project Management furthermore this is proven because I achieved High Distinction on this project managing techniques on my bachelor degree.

I do have good knowledge of typography for web design which includes UI and UX. These are used to make landing pages attractive and appealing, responsive to customers. I can design the product which customer loves to buy.
